

# formula 108

dry-side stain remover

**linden series** combines high-performance with formulations that preserve the soft feel and fresh scent to all fabrics. High tech solutions to common spot and stain problems allow you to get the most use possible from your linens and fabrics.

**Formula 108** is an essential and indispensable product for working and removing stains from garments when water or steam or wet-side spotting agents might detrimentally affect the fabric's dye or spread extraneous dyes contained in stains deposited on the fabric.

## features

- Formula 108 accelerates stain removal by speeding up the effect of oily-type spotters because it pre-dissolves the solvent-soluble components found in common dry-side stains.
- Formula 108 prevents ring formation and possible color damage if spotting agents are left on fabric too long. Formula 108 acts as a solvent to remove them thus reducing incidence of ring formation and color damage appearing after the dry cleaning process.
- Formula 108 is ideal for touch-up spotting after completion of the dry cleaning process. Any grease and soil-like finger marks can be removed by touching up with Formula 108 on spotting boards, presses and at inspection stations. It thus reduces timely and costly re-washes.
- Formula 108 can be used in conjunction with a wet-side pre-spotter like Formula 806, to form a 2:1 blend, which aids in removing unidentifiable stains, latex paints and deeply embedded soils. The dry-side Formula 108 portion of the blend dissolves the solvent soluble component of the stain while the wet-side Formula 806 solubilizes and suspends the aqueous soluble components.

## product specifications

|                       |                          |
|-----------------------|--------------------------|
| Physical Description  | Clear, water thin liquid |
| Fragrance             | Strong Ethereal          |
| Color                 | Colorless                |
| pH                    | N/A                      |
| Weight Per Gallon     | 12.09 lb./gal            |
| Storage Stability     | 1 year minimum           |
| D.O.T. Shipping label | 6.1, Trichloroethylene   |
