

# formula 72

protein stain remover

**linden series** combines high-performance with formulations that preserve the soft feel and fresh scent to all fabrics. High tech solutions to common spot and stain problems allow you to get the most use possible from your linens and fabrics.

**Formula 72** is formulated with a blend of environmentally friendly solvents, emulsifiers, organic alkaline compounds, and protease enzymes. This makes it the pre-spotter of choice for fast, safe and easy removal of protein stains including blood, eggs, milk, perspiration, and urine.

## features

- The organic alkaline controlled pH of the product aids in protein stain removal without detrimentally affecting most dyes and fabrics. This makes Formula 72 a fabric SAFE spotter without compromising on performance.
- Product's formulation allows one to safely flush with live steam directly –without fear of fabric/color damage. This makes Formula 72 perform in a shorter time – FAST, without need of a cold water rinse step.
- The protease enzymes present aid in the breaking down of tough protein-based and/or baked-in stains while the proprietary blend of emulsifiers and solvents enhance loosening, suspending and removal of soils into the cleaning bath. This makes Formula 72 the preferred spotter for safe, fast, and EASY removal of protein-based stains.

**Note** Formula 72, with controlled alkaline pH, is safe to use for fabrics and most colors not affected by water or steam. In the unlikely event of a color change when using formula 72, immediately apply Formula 54 to restore dye to its original color.

## product specifications

Physical Description	Clear, water thin liquid
Fragrance	Mild
Color	Light yellow
pH	8.8 - 9.0
Weight Per Gallon	8.35 lb./gal
Storage Stability	1 year minimum
D.O.T. Shipping label	None
