

response neutralizer

waste water neutralizer

linden series combines high-performance with formulations that preserve the soft feel and fresh scent to all fabrics. High tech solutions to common spot and stain problems allow you to get the most use possible from your linens and fabrics.

Response Neutralizer is a concentrated blend of acids. It can be used as a pH neutralizer for the effluent water in commercial laundries or as a sour for the final rinse in the wash cycle to eliminate residual alkalinity.

features

- A powerful yet economic non-phosphate, non-crystalline liquid acid for neutralizing alkalinity in the effluent of large commercial and institutional laundries.
- Concentrated active product that totally neutralizes residual alkalinity in the wash load.
- Cuts rinse water requirements.
- Helps prevent and remove rust stains, removes residual alkalinity, and dissolves hard water deposits on fabric - thereby preventing fabric yellowing, graying and weakening.
- Can be used on white and colored cottons, polyester, woolens and rayons.
- Compatible with fabric softeners, anti-chlors and starches.

optimal applications

Commercial laundries, hotels, motels, health care facilities, nursing homes, and restaurants.

product specifications

Physical Description	Clear, colorless liquid
Viscosity	Water thin
Color	Colorless
Flashpoint	None
Fragrance	Pungent
Weight per Gallon	10.2 lb. /gal.
pH	1.0 – 2.0
Storage Stability	1 year minimum
D.O.T. Shipping label	Class 8: Corrosive liquid
