

# rustex™

rust removing laundry sour

**st**  
santec®  
clean needs.met.™

**linden series** combines high-performance with formulations that preserve the soft feel and fresh scent to all fabrics. High tech solutions to common spot and stain problems allow you to get the most use possible from your linens and fabrics.

**rustex** is a concentrated liquid sour consisting of a blend of acids and acid salts designed to eliminate both rust and residual alkalinity in the final rinse in the wash cycle. It prevents discoloration and weakening of washed textiles while bringing fabric pH to proper level for safe contact with skin.

## FEATURES

- Iron chelating acids that remove iron and rust from fabric, solubilizing and suspending them in wash liquor.
- Concentrated active acid product that totally neutralizes residual alkalinity in the wash load.
- Removes yellow 'iron' stains from previously stained linen.
- Dissolves hard water deposits such as calcium carbonates previously encrusted on fabric, thereby removing the 'graying' hue from white and light colored garments.
- Cuts rinse water requirements.
- Can be used on white and colored cottons, polyester, woolens and rayons.
- Compatible with fabric softeners, anti-chlors and starches.

## OPTIMAL APPLICATIONS

Commercial laundries, hotels, motels, health care facilities, nursing homes and restaurants.

## IDEAL FOR

Tunnel washers, large industrial laundries and food processing laundries.

## PRODUCT SPECIFICATIONS

Physical Description	Clear, colorless liquid
Color	Colorless
Odor	Mild
pH (1%)	1.0 - 2.0
Viscosity	Water thin
Flashpoint	None
Weight per Gallon	8.9 lb./gal.
Storage Stability	1 year minimum
D.O.T. Shipping label	Class 8: Corrosive Liquid
