

# silicon

gel floor cleaner

**element series** consists of specialty products formulated to offer effective and safe solutions for customers' unique cleaning needs. For each solution developed another 'element' is added to the series. Providing our customers with the right solution for each task.

**Silicon** is an environmentally friendly, floor cleaner and maintainer in an easy to use gel form. Silicon is specially formulated to maintain and beautify all types of resilient and hard surfaces.

### features

- Silicon is an environmentally friendly product that contains no phosphates, silicates or free alkali.
- Economical thickened formula for greater saving.
- Formulated to be low foaming both at room temperature and at hot vat temperatures at 130 – 150 °F.
- Regular use removes slippery fats and grease that can cause slip hazards.
- Silicon is extremely versatile and can be used in many types of floors, except for wood floors.

### ideal for

Use through floor scrubbers, or by mopping to clean resilient (asphalt, rubber, asbestos, vinyl, linoleum and cork) and hard surfaces floors (marble, terrazzo, ceramic, slate, granite, etc).

### optimal applications

Shopping malls, restaurants, nursinghomes, offices, hospitals, clinics, schools, stores, fast food establishments and daycare centers.

### product specifications
